

GPS Locations by Month for BirdID: 8186\_2022

Latitude Over Time for BirdID: 8186\_2022

The figure is a scatter plot with 'Date' on the x-axis and an unlabeled numerical scale (likely cases) on the y-axis. The x-axis has major ticks for 'Feb 28', 'Mar 07', and 'Mar 14'. The y-axis has major ticks at 0, 20, 40, 60, 80, and 100. The plot is divided into two sections by a vertical line around March 4th. The left section (before the line) contains red dots, and the right section (after the line) contains blue dots. The red dots show a peak in early February, with values reaching up to 100. The blue dots show a peak in early March, with values reaching up to 100. The data points are clustered in vertical groups, indicating daily or near-daily measurements.
