

GPS Locations by Month for BirdID: 8406_2022

The scatter plot displays data points over time, with the x-axis labeled 'Date' ranging from February 01 to April 01. The y-axis represents a numerical variable. The data is segmented into three color-coded groups: red points from Feb 01 to Mar 01, blue points from Mar 01 to Apr 01, and green points from Apr 01 to Apr 05. The red group shows a wide distribution with a notable outlier at the top left. The blue group shows a more concentrated distribution with a slight upward trend. The green group shows a very tight cluster of points at the end of the period.
